

To All Commissioners

In order to have a more balanced decision making process that includes a disability lens, I am asking the Commission to support the following motion for City Council to consider adding another member to the Commission who can represent this community.

*In an effort to provide a more balanced and equitable Commission that will encompass an accessibility lens, the London Transit Commission is requesting London City Council to amend the current by-law (A-6377-206, Section 3.) to:*

- *Add one more voting member of the public to the London Transit Commission using an accessibility lens for selection, bringing the Commission to six members.*

*Consideration would be requested that the additional Commissioner would be in place for December 1, 2023 to allow time for application, appropriate selection and approvals.*

Thank you,

Sheryl Rooth
